

# Tighten Up!

Have you heard of the new **THERMIRF™** treatments available Graper Cosmetic Surgery?

You can lose loose skin on tummy, arms, face, chin, neck, knees and thighs with this latest generation of non-surgical tightening treatments using radio frequency energy delivered under the skin. The results? No less than remarkable! The tightening effects of **THERMIRF** are achieved with little to no down time. Choose from three **THERMIRF** treatments depending on your problem areas.

**THERMITight™** Tighten loose skin on arms, face, neck, knees, tummy, thighs and reduce double chin! This minimally invasive, single-treatment procedure contracts the tissue that overlies the muscle, causing a tightening effect and collagen building. A local anesthetic is used. Results can be seen in as little as a week up to 9 months, and can last for several years.

**THERMISmooth™** Tighten loose skin on and under the eyes, cheeks, mouth and décolletage with this targeted procedure that feels like a hot stone massage. A series of 3 non-surgical treatments are required to achieve maximum results and can be repeated as needed.

**THERMIVA™** Reclaim, restore and revive feminine wellness with this life-changing procedure. This non-surgical treatment offers remarkable results for incontinence, mild-to-moderate labial external laxity and internal vaginal laxity and dryness, without discomfort or downtime. In three treatments over three months, all these issues are improved or resolved.

Request your private, personal consultation for new **THERMIRF™** procedures by calling 704.375.7111 or email [cgibson@grapercosmeticsurgery.com](mailto:cgibson@grapercosmeticsurgery.com).
